GBB HAIR CARE AND MAINTEMANCE

Congratulations on choosing GBB 100% Cuticle Remy Hair Extensions!

GBB Hair Extensions are designed to enhance your natural beauty by adding **volume, length, and dimension** through highlights or vibrant colors. To ensure long-lasting results and maintain the quality of your extensions, please carefully review and follow the home care guidelines below. Adhering to these instructions will help you enjoy your extensions to their fullest potential.

Home Care Instructions

- **Do not shampoo your extensions for 48 hours** after installation.
- **Never sleep on wet hair.** Ensure your hair is completely dry before bed. Secure it in a loose braid or soft scrunchie to prevent tangling.
- Each morning, **gently undo your braid or ponytail with your fingers** and brush using a **100% boar bristle brush** or **professional U-Loop brush**, starting from ends to roots, section by section.
- **Keep your hair clean.** Wash 1–2 times per week with warm water. Dirt, sweat, and oil buildup can cause tangling.
- **Always wash hair in one direction** (upright position). Apply shampoo with a little bit of conditioner together, squeezing from top to bottom. Rinse thoroughly, then reapply conditioner, finger-comb, and rinse again.
- **Do not scrub when drying.** Gently wrap hair in a towel to absorb moisture, then blow-dry on **medium heat**.
- **Do not brush wet hair.** Finger-comb while drying, and only brush or style when completely dry.
- **When swimming**, wear a protective cap. Chlorine and saltwater can cause dryness, color change, or tangling. Before entering a spa, brush and secure hair in a braid or wrap it in a damp towel. Avoid **hot tubs and saunas**, which can weaken bonds and cause frizz.
- **Avoid overexposure to chlorine, saltwater, sulfur, or excessive heat,** as these may damage the bonds, affect color, or cause tangling.
- **Do not tint, color, or perm** your extensions yourself. GBB Hair is pre-processed at the manufacturer level. If coloring is necessary, it must be done **by a licensed professional only**—especially with lighter shades.
- **Styling tools** such as curling irons, blow dryers, and straighteners may be used on **medium heat (300–350°F)**. Do not apply direct heat to **keratin bonds, tapes, or beads**.
- Use of **heat protectants or purple shampoos/conditioners** may alter the color of your extensions due to chemical reactions and make the hair dry or brassy; use at your own discretion.
- **For Beaded Weft Extensions:** Due to higher hair density on each track, wash and maintain regularly, but keep oily products and conditioners away from the roots to prevent shedding. When brushing, **hold the track** to prevent breakage or shedding.

Longevity & Maintenance:

With proper care, **GBB Hair Extensions last 4–8 months** or longer, depending on your lifestyle, hair growth, and maintenance routine. Some shedding or strand loss is normal.
Only a **certified GBB extensionist** should perform any services on your extensions — including removal, coloring, perming, or chemical treatments. Improper handling can cause irreversible damage.

Client Agreement

I, _____, acknowledge that I have read and understood the above care instructions and agree to follow them as outlined.

I understand that:

- There are **no refunds** on deposits, GBB hair purchases, or installation services.
- I am **solely responsible** for maintaining my extensions after application.
- I waive all rights to hold GBB Hair, the salon, or the certified extensionist responsible for any loss or damage to my extensions due to improper care.
